RD2035

Mr. Dave Wheeldon, Chief
Flood System Sustainability Branch
Flood Maintenance Office
Division of Flood Management
Department of Water Resources
3310 El Camino Avenue
Sacramento, California 95821

Subject: Request to arrest erosion along the right (west) bank of the Sacramento River near the Woodland-Davis Clean Water Agency Intake Facility

Dear Mr. Wheeldon,

As shown on the attached pictures, the bank of the Sacramento River is eroding at a location downstream of the Woodland-Davis Clean Water Agency Intake Facility (38°40'32.37"N 121°37'47.82"W). If this erosion is not arrested soon, it could compromise the existing infrastructure at this location including the newly-constructed Woodland-Davis Clean Water Agency Intake Facility.

We would like to discuss with you the California Department of Water Resources (DWR), and U.S. Army Corps of Engineers (USACE) programs such as the Sacramento River Bank Protection Program to arrest the erosion at this location. If needed, we would be glad to meet with you and your staff at the erosion site to explore all of the available options for arresting the erosion.

If you have any questions regarding this matter, please call me at (530) 308-0681 or via e-mail at mike@conawayranch.com, or you may contact RD 2035 Engineer Jay Punia at (916) 870-0770 or jpunia@woodrogers.com.

Sincerely,

Mike Hall, General Manager
Reclamation District 2035
45332 County Road 25
Woodland, California 95776
