**Project Address:** Pump #1

**Date:** 7/4/24

**ATTN:** Conaway/Rec District 2035

**RE:** Pump #1 Rebuild

Dear Conaway/Rec District,

The following is a scope of work and price to build a new 10hp 1800rpm lift pump to replace the current lift pump that is rotten. A new complete lift pump will be built, and epoxy coated inside and out to help prolong the life span of the pump. The new pump will produce around 2700 gallons per minute and be 76 percent efficient.

## **Scope Of Work:**

- Fabricate a new complete lift pump assembly.
- Apply epoxy coating on the new lift pump inside and out to help prevent deterioration.
- Design a new pump bowl to produce around 2,700 gallons per minute.
- Assemble lift pump with new pump bowl and new tube & shaft and a new head shaft.
- Install the new complete lift pump onto pump structure.
- Connect discharge with a new dresser coupling.
- Install new 10hp 1800rpm hollow shaft motor.
- Wire motor to pump panel.
- Check rotation of electric motor.
- Take adjustment on pump bowls and test run the operation of the pump.

**TOTAL ESTIMATE WITH TAX: \$31,204.42**
