**Project Address:** Lift Pump #4 Of County Road 25

**Date:** 11/6/23

**ATTN:** Conaway Ranch

**RE:** Lift Pump #4 Repairs

Dear Conaway Ranch,

The following is a scope of work and price to build a replacement lift pump with discharge wye. The new lift pump and discharge wye will have a protective coating to help prevent rust. The existing impellor and suction bell are in good condition, but the diffuser has some extreme pitting and will need to be replaced. The motor will have a cleaning and the bearings replaced to prevent any issues since a low rpm motor is hard to come by.

**Scope Of Work:**

- Unwire motor and unbolt motor from pump. (Work already performed)
- Unbolt dresser coupling on discharge. (Work already performed)
- Remove the motor and pump. (Work already performed)
- Bring the pump and motor back to the shop. (Work already performed)
- Disassemble pump and bowl to identify any unforeseen issues. (Work already performed)
- Have the motor shop inspect and perform maintenance on low rpm motor.
- Reassemble bowl with new diffuser and bearings.
- Reassemble lift pump with new tube and shaft.
- Reinstall new lift pump and connect discharge.
- Install motor with all necessary connections.
- Test run new lift pump.
