

STREAMLINE

The Special District Website Engine

Our commitment is to empowering Special Districts to connect with their constituents in a painless, transparent manner.

Streamline is cloud-based software designed for special districts, meant to give district staff complete control over their websites. It requires only an internet connection, and no special technical knowledge.

Features of note:

20 minutes or less: online wizard helps you collect necessary information quickly—enough information to have a live-ready website in about 20 minutes. The wizard also acts as a tutorial, allowing you to get comfortable with the content creation process a bit at a time.

Full featured CMS: the system is flexible and powerful enough that you can then add additional content, menu items and assets. You have complete control over everything: your navigation, your content, your images and files. Storage space is unlimited. File size is unlimited. No need to resize photos before uploading.

Compliance tools designed to keep you safe: the meeting dashboard shows you where you may be missing agendas and minutes, and sends you reminders before agendas need to be online per the Brown Act. Full Section 508 compliance means your site is accessible to people with disabilities. Transparency dashboard guides you through publishing the content required to be considered a transparent organization, and the automated transparency report ensures the content is accessible to the public. When the state brings new online mandates in the future, Streamline Web will be updated to help you stay in compliance.

Completely mobile friendly: Streamline is fully responsive, making it easily readable on any device, regardless of the size. This helps district sites to be included in Google search results for mobile users.

Flexible design: Logo uploader and color scheme picker allows the client to customize the site with two clicks; additional themes and ability to add custom CSS are available for more advanced needs.

Domain name assistance: automatically generated URL (eg: www.acme.specialdistrict.org) allows district to go live without the need for buying and managing domain names, although existing domain names can also be used (eg: www.acmemunicipaldistrict.org).

Future-proof: provided as SaaS, enabling the client to never worry about upgrading software, reinvesting in new technology, or building a new site. New features and themes become available to all clients at no additional cost.

Fully supported: unlimited support and training is included with membership. No more counting on your board secretary's son to update your website; we're here and ready to support you. :)

No risk: one low, all-inclusive [monthly subscription fee](#), no long term commitment, and no up front investment saves many tens of thousands of dollars and eliminates the need for RFPs.
